PRESS RELEASE

FOR IMMEDIATE RELEASE

BRINGING PERSPECTIVE™ TO INCIDENT MANAGEMENT AT DE BEERS CANADA De Beers Canada selects PPM 2000's Perspective software for enterprise-level Incident & Investigation Management.

Edmonton, AB—January 25, 2007—PPM 2000, the leading developer of Incident Reporting and Investigation Management software, announced today that De Beers Canada has selected Perspective by PPM 2000 for their corporate-wide Incident Management solution.

“De Beers Canada puts an emphasis on proactive risk management in order to ensure the security of all our assets, which include people, processes, product and information,” said Tom Raine, Manager Protective Services Operations for NWT Projects. “We considered a number of options, but at the end of the day, it was clear to us that Perspective would provide the solution that best fits our needs.”

De Beers Canada's commitment to comprehensive Incident Reporting and Investigation Management is evident in their decision to augment their core Perspective system with modules that facilitate online incident reporting for employees (e-Reporting); enhance their ability to efficiently solve investigations (Visual Analysis); and monitor ongoing incident activity to measure performance, aid decision making and increase accountability (Performance Management).

“Intimately familiar with the needs of De Beers Canada and the capabilities of Perspective, I confidently recommended Perspective to De Beers Canada. It is an enterprise-level solution with an innovative and forward-thinking approach to incident management,” remarked Geoff Frisby of Shepp Johnman Inc.

“With Perspective's single enterprise platform to capture and report data relative to incidents, investigations and exposure, De Beers Canada will enhance their ability to intelligently action and query their data for trending, risk mitigation and planning activities,” said Don Murphy, President & CEO of PPM 2000. “We are honored to have De Beers Canada as a client, and we look forward to working closely with them in the successful implementation of their Incident and Investigation Management system.”

About De Beers Canada:

De Beers Canada is investing \$2 billion dollars over three years in Canada to build the Snap Lake Mine in the Northwest Territories and the Victor Mine in northern Ontario. The Snap Lake Mine will be the company's first Canadian mine to open and is on schedule for opening in October this year. The Victor Mine will open in 2008. De Beers's two mines will increase the value of Canadian diamond production from \$1.5 billion per year to \$2.4 billion.

About PPM 2000 Inc.:

PPM 2000 was established in 1988 to develop Incident Reporting and Investigation Management software for the Corporate Security industry. The company's enterprise-level solutions help organizations accomplish their security, risk management and compliance objectives through data-driven decision making and knowledge management.
