PRESS RELEASE

FOR IMMEDIATE RELEASE:

ANNOUNCING THE LATEST RELEASE OF PERSPECTIVE BY PPM 2000

With an emphasis on mobility and collaboration.

Edmonton, Alberta, Canada—March 12, 2008—PPM 2000, the leading developer of Incident Reporting and Investigation Management software for security, safety and risk management, announced today the release of Perspective™ Version 1.2.

With Perspective 1.2, enhancements have been made throughout the system including performance, ease of use, analysis and reporting. To reduce data entry time and improve the clarity of narratives, summaries and interviews, the enhanced word processor supports hyperlinks, features import and export capabilities and increases formatting options. For faster searching and advanced reporting, the redesigned Analysis Expert offers a more intuitive interface and new charting options. The most significant change in Perspective 1.2 is its new Import Manager and the ability to save time and ensure consistency by integrating data from other applications, including access control systems, CRM software and guard tour devices.

“Perspective represents a new generation of Incident Reporting and Investigation Management software, and this latest release showcases our commitment to integrating with external solutions,” said Don Murphy, President & CEO of PPM 2000. “With an emphasis on mobility and collaboration, Version 1.2 solidifies Perspective’s potential as a true, enterprise-wide Incident Reporting and Investigation Management system.” Perspective’s Product Manager, Ryan Thiessen, added, “We are committed to working with the latest technology to help our clients take advantage of the multiple synergies between applications, departments and colleagues, and we are only just beginning to explore Perspective’s potential for integration and convergence.”

While Perspective 1.2 continues to reflect PPM 2000’s twenty years of experience developing, selling and supporting Incident Management software, it also considers the initial feedback Version 1.0 garnered from industry specialists, existing clients and new users. PPM 2000 remains committed to this dynamic process where development plans evolve to reflect the feedback and priorities of the people who use Perspective on a daily basis.

About Perspective by PPM 2000:

Track. Analyze. Report... PREVENT. With Perspective™ by PPM 2000, organizations benefit from a single enterprise platform to capture and report data relative to incidents and investigations. Users can intelligently action and query their data for trending, risk mitigation and planning activities. Then, with the ability to accurately assess what is happening and its potential impact, they can make informed decisions that optimize performance and illustrate the effectiveness of their security operation.

About PPM 2000 Inc.:

PPM 2000 Inc. was established in 1988 to develop Incident Reporting and Investigation Management software for the corporate security industry. The company's enterprise-level solutions help organizations accomplish their security, risk management and compliance objectives through data-driven decision making and knowledge management. Thousands of organizations have implemented a PPM solution, and the company's clients span all industries and include many of the Fortune 1000. PPM 2000 is a Microsoft Gold Certified Partner.
